

KCeComLink

Integrate Your Web Shop & Accounts Software

- > Link stock and ordering details
- > Full integration with OpenCart eCommerce
- > Export accounts information for integration to virtually any online system
- > Integration with all major small and medium accounts packages

Utilise your **existing product information online** and link all important information

Linking your eCommerce shopping cart to your accounts software has never been easier with KC eCommerce Link which integrates the popular OpenCart eCommerce solution with your finance package and also allows for data from your accounts system to be exported to intermediary tables for integration with virtually any online eCommerce or CMS system.

By linking to all of the major finance software packages for small and medium sized businesses with your online shopping cart you will be able to seamlessly link together your online sales and your financial records and all of your data can be synchronised between your finance software and your core business systems.

KC eCommerce Link integrates with many of the leading accounts packages such as Sage Line 50, Sage 200, Pegasus Opera II, Pegasus Opera 3, IRIS Exchequer, Access Accounts as well as KC Back Office.

Integrates directly with:

Sage 50 & Sage 200
Pegasus Opera II & 3
IRIS Exchequer
Access Accounts
KC Back Office Accounts

Key features and benefits:

- > Linked product records between both systems
- > Instantly updated and shared prices online
- > Stock availability information
- > The ability to view and report on your online sales history
- > Automatically handle account sales and special account customer pricing
- > All online sales directly imported into your finance package
- > Real-time updates for stock levels
