

Personal Data Search

Across your Opera 3 system there are numerous areas that store personal data, from sales contacts and payroll records through to Cashbook and CRM. Individuals whose information you hold have the right to make a Subject Access Request (SAR), asking for precisely what information you hold on them. When you receive a SAR, you are required by law to provide them with a copy of the personal data you hold on them.

When it comes to responding to SARs, the requirement is that you respond in the same format as that in which the request was made. If you therefore receive a SAR by email, responding to it and providing the data you hold should also be in electronic format.

Do you know where that data is stored in Opera 3? Can you easily provide them with a copy of their information, especially if it needs to be in electronic format? If the answer is No, Opera 3 Personal Data Search can help you with exactly that.

Personal Data Search is a simple to use and extremely effective tool for identifying personal data in Opera 3 and presenting it in the required format, a process which would otherwise take a considerable amount of time. It will be invaluable when you receive Subject Access Requests from customers, prospects, suppliers or employees and need to locate the relevant data and provide it in either printed or electronic format.

Respond to Subject Access Requests quickly and easily

Personal Data Search is designed to help Opera 3 users locate personal data held within an Opera 3 company. All you need to do is enter the personal information you know and Personal Data Search will scan through Opera 3 and display a list of the records that match your search criteria. You can search using a wide range of criteria, from surname, postcode and email address to address line and phone number, as well as more detailed information such as customer account code and employee reference or NI number.

The areas of the system that are searched include:

- Sales Ledger: customers and contacts
- Purchase Ledger: suppliers and contacts
- CRM: Sales Regions/Territories/Types/Routes/Despatch
- CRM: company processing, contact details, contact addresses, helpdesk calls
- Nominal Ledger: banks
- Cashbook: payees
- Fixed Assets: locations and insurance companies
- Payroll: employee details, pension scheme contacts, bank contacts
- Personnel: employee details, including emergency contacts
- People Profiles

When you perform a search, the data that matches your search criteria is displayed alongside the related personal information such as address, telephone number, email address, etc. You can also see where that data is located, such as CRM, Personnel and so on. If your search has resulted in multiple individuals, this will help you to locate and select the correct contact more easily.

You can then select which elements of this personal information to extract, and you have the option to print it, export to Excel or export as a .csv file, all of which are acceptable ways of providing the required information.

This gives you all the flexibility you need to provide data in different formats when responding to a Subject Access Request, especially if you have to provide the information in electronic format.

Personal Data Search is a chargeable feature.

The screenshot shows the 'Criteria' tab of the 'Personal Data Search' window. It contains a search form with the following fields: Postcode, Address line, Surname, Forename(s) or Initial(s), Email address, and Telephone number. The 'Surname' field is populated with 'Godson' and the 'Address line' field is populated with '88 Willow Drive'. There are radio buttons for 'Find a match' options: 'Only if it contains all the search items' and 'If it contains any of the search items'. A 'Search' button is at the bottom right.

Search criteria entry

The screenshot shows the 'Results' tab of the 'Personal Data Search' window. It displays a table of search results with columns: Include, Where found, Application, and Found. The table contains three rows of results. Below the table, there is a section for 'Personal data (1001 - Employees)' with a table showing selected items and their content. The 'Include' column has checkboxes for 'Employee Reference', 'Title', 'Surname', 'Forenames', 'Nat. Ins. No.', 'Birth Date', 'Payee', 'Address Line 1', and 'Address Line 2'. The 'Content' column shows the corresponding data for each item.

Include	Where found	Application	Found
<input checked="" type="checkbox"/>	00000002 - Contact Details	CRM	Godson
<input checked="" type="checkbox"/>	1001 - Employees	Payroll	Godson, R GODSON
<input checked="" type="checkbox"/>	1001 - Personnel Employees	Personnel	Godson, Godson, 88 Willow Drive
<input checked="" type="checkbox"/>	GODSR001 - People Table	System	Godson

Item	Content
<input checked="" type="checkbox"/> Employee Reference	1001
<input checked="" type="checkbox"/> Title	Mr
<input checked="" type="checkbox"/> Surname	Godson
<input checked="" type="checkbox"/> Forenames	Richard
<input checked="" type="checkbox"/> Nat. Ins. No.	GYS48374A
<input checked="" type="checkbox"/> Birth Date	03/06/1971
<input checked="" type="checkbox"/> Payee	R GODSON
<input checked="" type="checkbox"/> Address Line 1	6 The Grove
<input checked="" type="checkbox"/> Address Line 2	Wiston Mallet
